Presidents Address

President then delivered his address as follows: Brethren we are thankful that we have been permitted to meet in this our 30th Annual Session.

We congratulate the Sub Alliance that have furnished Delegates to compose this body, it is evidence there is continued faith in our order and especially so when we have considered that there has practically no Lecture work been done during the year, also we have had no aid whatever through the medium of printers ink. It is gratifying and encouraging however to find from our Secretary's books an increase of membership over last year.

As we look back through the past 30 years history of our order we of course have made mistakes, have realized that we have made mistakes, we would not have been mortal had we not. But we have cause for rejoicing over some of our successes. We were the first Brotherhood to declare for State wide prohibition, no religious denomination can claim this honor. Nearly every legislation demand made by our order in both State and Nation in years past has been inacted into law. We have accomplished untold good among the Farmers educationally. We have developed a better State, mentally, socially, morally and financially. Nor is the work done? Nay this is a progressive age, and the probability is the work and necessity for our organization will be greater the next 30 years than in the past.

I recommend that you give the subject of reorganizing and building up your order your best thought and attention. If the plan we have now is the best we can devise. It should be executed more affectually.

Model Communities

We are pleased to note the interest manifested in our State in the establishing of model communities and my information is that North Carolina enjoys the distinction of having established the first one in the United States. This is a work it seems to me the Sub Alliance in the different sections of the State could embrace and make interesting and profitable to their communities.

Public Education

We should feel proud of the progress of Public Education in our State since our State meeting held 27 years ago in Asheville, when we declared emphatically for more tax money for Public School purposes and a better public college education for boys and girls alike. Yet we feel sure many needed improvements can be made in our State public School System. We note a growing sentiment among the people in favor of our county boards of Education and Superintendents being elected by the voters of each county. Also we hear a good deal of complaint

of text books for our schools. There is no necessity for so many changes unless the changes should be improved upon for these often changes cause needless loss to patrons. These things will be remedied we hope in the next legislature.

Farmers Loan Law

We welcome such a law of our nation though we do not believe in its present form it will meet the entire need of our farmers, yet it is the best that has ever been offered us. We recommend that a committee be appointed at this meeting to co-operate with a like committee from the Farmers Union in doing every thing possible to secure one of these Federal Loan Banks in the city of Raleigh, N. C.

Good Roads

This is a question of much importance to us and should receive our hearty support. Our city brother has since the introduction of automobiles become as much interested as we.

We have learned much in recent years and there is still much to be learned, much about building and maintaining public roads on an economical scale. In my opinion the Sand Clay roads are the cheapest and best roads we have.

Home Supplies

I notice with pleasure our farmers have been growing gradually out of the one money crop system and we have marched out some faster since our cotton experiences in 1914.

As farmers we should strive to produce an abundance of home supplies and let our surplus crops be diversified money crops.

This accomplished we will be a happier and a more prosperous people.

Hoping that all who attend this meeting will have a pleasant time and that our meetings will prove profitable to us all and a great revival of our beloved order may be accomplished

through ensuing years. I am Fraternally yours

J. C. Bain.

On motion the address was ordered published and spread upon our minutes.

Report of Secretary

To the North Carolina Farmers State Alliance, greetings. I bring to you. I am happy to report to you at this your 30th, Annual Session. You have been dead for years. But for some cause you have struggled and toiled and kept alive and to day you stand on higher ground.

I am encouraged in the prospect of your noble order. Our receipts show a slight gain over last year. Notwithstanding the handycap of our lecturer, not being able to work for the want of means, yet the Brethren have stood true, save in one county, the name of which I need not mention. And some counties have gained. Our receipts for last year was \$135.55. This year there are \$154.30 a gain of \$18.75.

I told you a year ago that new life was coming into our order, these receipts verify this statement. I want to ask you to have strong faith, abiding hope, enduring courage, and filial love, and work with an enthusiasm that knows no failure and the banner of your order will rise and shine for the eternal year of God, our hero.

Respectfully submitted

J. H. Evans, Sec. Treas.

Brethern of The North Carolina State Alliance, your executive committee would respectfully report that they have examined the report of your trustee, Bro. H. E. Thompson, and find the same correct. Showing a balance in cash \$371.42. Amount of North Carolina bonds \$7000.00.

That the people of North Carolina have a right to rejoice in the great improvement in the Educational advantages of the people of the State. Especially in the close relation now established between the people and our great University and Colleges. We would, however recommend the Supt. of Public Instruction and the Board of Education in the various counties be elected by the people.
